

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and activities. It emphasizes that proper record-keeping is essential for transparency and accountability, particularly in the context of public administration and financial management. The text notes that without reliable records, it is difficult to track the flow of funds and ensure that resources are being used as intended.

2. The second part of the document addresses the challenges associated with data collection and analysis. It highlights that gathering comprehensive data from various sources can be a complex and time-consuming process. However, the benefits of having a complete dataset are significant, as it allows for more informed decision-making and the identification of trends and patterns. The document suggests that investing in robust data management systems and training staff in data analysis techniques can help overcome these challenges.

3. The third part of the document focuses on the role of technology in modernizing operations. It argues that leveraging digital tools and platforms can streamline processes, reduce errors, and improve efficiency. For example, the use of cloud-based storage and collaboration tools can facilitate better communication and data sharing among team members. Additionally, the document mentions that automation of routine tasks can free up valuable time for staff to focus on more strategic and high-value activities.

4. The fourth part of the document discusses the importance of continuous learning and professional development. It states that in a rapidly changing environment, individuals must stay updated on the latest industry trends and technologies. Encouraging employees to pursue relevant courses, certifications, and workshops can help build a more skilled and adaptable workforce. The document also suggests that organizations should create a culture of learning, where knowledge sharing and mentorship are encouraged and supported.

5. The fifth and final part of the document provides a summary of the key points discussed and offers some concluding thoughts. It reiterates that success in any organization depends on a combination of effective record-keeping, data-driven insights, technological adoption, and a commitment to ongoing learning. The document concludes by expressing confidence that the strategies outlined will lead to improved performance and long-term sustainability.

INTRODUCTION.

The work of the Meteorological and Magnetical department of the Observatory has been carried on as described in the introduction to the report of 1892. It was there mentioned that the recording apparatus of the Robinson Anemometer had not been working satisfactorily. It was sent to R. Munro, Engineer, of London, on April 9th, and was replaced by another of the same dimensions on August 5th. The usual wind-synopsis is, therefore, wanting in our weather reports of these and the intervening months.

The annual inspection of the Meteorological instruments belonging to the Board of Trade, was made on the 18th and 19th of September, by Mr. Baker, of the Kew Observatory.

The heavy gale of December 22nd, gave us our highest recorded velocity, at 72 miles an hour. The details of the storm are given in the December report, page 31.

The scale co-efficient of the Bifilar magnetometer was tested again in October, as in the previous year, and was found to have suffered no appreciable change. The exact value of one centimeter displacement of the spot of light upon the photographic paper

is now,	1894,	0.000512	C.G.S. units
and was in	1893,	0.000511	„
and in	1892,	0.000515	„

The most remarkable disturbance of the magnets during the year occurred on November 13, beginning abruptly at 2 p.m. A comparison with the Kew record of the same disturbances shows that the changes of force

and direction were much greater at Stonyhurst than at Kew, from 3 p.m. to midnight. At 8-15 p.m. a very sudden increase of horizontal force was shown by the Bifilar magnetometer, the spot of light moving off through 6.0 centimeters and back again in five minutes, and continuing its rapid movement, responding to decreasing force, through 4.6 centimeters in another two minutes, when it left the the cylinder and did not return for 20 minutes. If we suppose that the rest of this movement as closely resembled that of the smaller oscillation at Kew, as the recorded part of it, the complete swing of the light-spot, from maximum to minimum of force, would be through 15.2 centimeters in 12 minutes, just three times that of the Kew curve. The Unifilar magnetograph shows also considerably greater changes of direction at Stonyhurst than at Kew.* Smooth curves drawn through the oscillations would show, in general, westerly deflection corresponding with increase of horizontal force; but many of the quicker oscillations show decrease of force with westerly deflection.

The subject has been mentioned, informally, at a meeting of the Royal Astronomical Society; and it is hoped that the means may be found by one or more of the Scientific Societies for the multiplication of Magnetic Observatories, with the object of determining, for the greater disturbances, the terrestrial position of maximum effect. To know this, is a necessary step for the advancement of our knowledge about the causes of these unexplained storms; and a single instrument of simple make, the Unifilar magnetograph, at each station would be enough for the purpose.

The interruption of the Solar Chromospheric measurements, mentioned in our report of last year, has led to its discontinuance, on the grounds that the work is being carried on at Rome under much more favourable conditions by Professor Tacchini, and that in the varying state of our own inconstant climate, the average length of the chromospheric line C appears to be as much a measure of the transparency of our atmosphere as of the depth of the Solar chromosphere.

* The Bifilar instruments at the two observatories are practically of the same sensibility, the one at Kew being a trifle more sensitive. The Unifilar at Kew is more sensitive than the Stonyhurst instrument in the proportion of 11:8.7.

The drawings of the Sun spots and faculæ have been continued as formerly, notwithstanding the completeness of the series of photographic pictures of them collected at Greenwich ; because there is reason to believe that the visual and photographic images are not identical.

Our conclusions from a study of the Solar Drawings, made during 1889, the year of least spot-frequency, of the magnetic curves of the same period, and of our recent photographs of the spectra of Sun-spots and faculæ, have been given in a communication to the Royal Astronomical Society, published in the November number of the Monthly Notices.

The entire collection of Sun spot drawings is now under examination, with the object of testing the Wilson Theory of "Cavities." The work of mapping the spectra of the brighter stars from the photographic plates, obtained with the old 8 inch-objective of the Equatorial telescope, is nearly complete. The results of both these studies will also be communicated to the R. A. S. when ready.

The stellar work of the Father Perry-Memorial-objective has been carried on without the loss of any available clear night, and the large number of photographs of the spectra of stars, made during the year, shows our gain in time by the greater aperture. But only a few of these plates will be of service for future study ; all the work having been expended upon a long series of experiments connected with the perfection of our small photo-spectrograph. The photographs have been from the beginning stronger, and have extended further into the violet end of the spectrum, than was possible with the 8 inch glass ; but it is only recently that the sharpness of the definition has been brought up to match the delicate markings on the photographs given by the old objective. These experiments and their results will be given in detail when complete. But it may be mentioned here, to guard against misinterpretation, that in our method of photographing the spectra of stars, without a slit, it was not expected that the greater light power and longer focal length of the new glass would give as perfect definition as the weaker instrument when employed upon a star of sufficient brightness.

METEOROLOGICAL REPORT.

JANUARY, 1894.

Results of Observations taken during the Month.	Mean for the last 47 years.	
Mean Reading of the Barometer	29·827	29·489
Highest " on the 3rd	30·241	30·281
Lowest " on the 20th	28·824	28·587
Range of Barometer Readings	1·417	1·694
Highest Reading of a Max. Therm. on the 11th	52·8	51·6
Lowest Reading of a Min. Therm. on the 5th	10 0	20·4
Range of Thermometer Readings	42·8	31·2
Mean of all the Highest Readings	42·9	42·2
Mean of all the Lowest Readings	31·8	32·5
Mean Daily Range	11·6	9·7
Deduced Monthly Mean (from Mean of Max. and Min.)	36·9	37·1
Mean Temperature from Dry Bulb	37·4	37·1
Adopted Mean Temperature	37·2	37·1
Mean Temperature of Evaporation	35·6	35·9
Mean Temperature of Dew Point	33·3	33·8
Mean elastic force of Vapour	0·191 in	0·195 in
Mean weight of Vapour in a cub. ft. of air ..	2·2gr	2·4 gr
Mean additional weight required for saturation	0·4gr	0·4 gr
Mean degree of Humidity (saturation 1·00) ..	0·86	0·86
Mean weight of a cubic foot of air	547·4gr	549·5 gr
Fall of rain	4·617 in	4·141 in
Number of Days on which rain fell	28	19·8

JANUARY, 1894.

No. of days in the month on which the prevailing wind was	N	NE	E	SE	S	SW	W	NW
	1	1	6	7	2	7	6	1
Mean Velocity in miles per hour	7.9	9.3	10.1	14.1	18.0	16.3	18.8	4.8
Total No. of miles for each Direction	189	222	1452	2372	863	2739	2710	114

The total No. of miles registered during the month was 10661.

The max. Velocity of the wind was 45 miles per hour.. Direction S by E. on the 29th at 9 p m.

Mean amount of Cloud (an overcast sky being indicated by 10.0) 8.3

In the month of January, the highest reading of the Barom-

eter during 47 years, was on the 18th in 1882, and was 30.480

The lowest ,, 26th, 1884 ,, 27.803

The highest Temperature 7th, 1887 ,, 59.9

The lowest ,, 15th, 1881 ,, 4.6

The highest adopted mean temperature of the month, 1875 42.5

The lowest ,, ,, 1881.... 29.2

January opened this year, as last year, with a very cold week. The coldest period of the frost covered the three days, 5th, 6th, and 7th; during which the highest temperature was 27°, the lowest 10°, and the mean temperatures approximately 19°, 20°, and 21°. The barometer stood high during the first 4 days; it then fell below the annual mean, and remained low for the rest of the month, with short oscillations, never reaching 29.7 inches, and only 5 times rising above 29.5. Ground frost on 17 days. Snow on 10 days. Hail on 3 days.

FEBRUARY, 1894.

Results of Observations taken during the Month	Mean for the last 47 years.	
Mean Reading of the Barometer.....	29.482	29.506
Highest ,, on the 18th....	30.116	30.064
Lowest ,, on the 11th....	28.376	28.681
Range of Barometer Readings.....	1.740	1.388
Highest Reading of a Max. Therm. on the 7th	53.6	52.1
Lowest Reading of a Min. Therm. on the 18th	23.5	22.4
Range of Thermometer Readings	30.1	29.7
Mean of all the Highest Readings.....	45.6	44.3
Mean of all the Lowest Readings	33.7	33.6
Mean Daily Range.....	11.9	10.7
Deduced Monthly Mean (from Mean of Max. and Min).....	39.3	38.4
Mean Temperature from Dry Bulb.....	39.9	38.4
Adopted Mean Temperature	39.6	38.4
Mean Temperature of Evaporation	37.9	36.9
Mean Temperature of Dew Point	35.7	34.7
Mean elastic force of Vapour	0.210in	0.193in
Mean weight of Vapour in a cub. ft. of air	2.4gr	2.4gr
Mean additional weight required for saturation	0.4gr	0.4gr
Mean degree of Humidity (saturation 1.00 ..)	0.86	0.87
Mean weight of a cubic foot of air.....	547.6gr	548.6gr
Fall of Rain.....	6.783in	3.556in
Number of days on which Rain fell	23	17.2

No of days in the month on which the prevailing wind was	N	NE	E	SE	S	SW	W	NW
	0	3	2	1	2	8	12	0
Mean Velocity in miles per hour	0	4.0	6.6	9.2	11.3	17.8	18.4	0
Total No. of miles for each Direction	0	291	315	220	542	3358	5299	0

The total number of miles registered during the month was 10025.
The max. Velocity of the wind was 59 miles per hour. Direction W., at 5 a.m., on the 12th.

FEBRUARY, 1894.

Mean amount of Cloud (an overcast sky being indicated by 10·0)	8·1
In the month of February, the highest reading of the Barometer during 47 years, was on the 11th, in 1849, and was ..	30·452
The lowest	„ 6th, 1867 „ 28·208
The highest Temperature	8th, 1877 „ 58·3
The lowest	„ 18th, 1892 „ 8·1
The highest adopted mean temperature of the month, 1869....	44·0
The lowest	„ „ 1855.... 28·6

A wet month, with nearly double the average rainfall. The heaviest fall, $1\frac{1}{2}$ inch, occurred on the 10th, preceding the gale of 11th, 12th. The barometer reached its lowest reading 28·376 between the rain and the wind storms; but the weather had been generally rough from the 5th. Ground frost on 18 days. Snow on 3 days. Aurora borealis seen on 2 days.

MARCH, 1894.

Results of Observations taken during the month.	Mean for the last 47 years.	
Mean Reading of the Barometer	29.477	29.474
Highest " on the 23rd.....	30.091	30.088
Lowest " on the 13th.....	28.370	28.685
Range of Barometer Readings	1.721	1.398
Highest Reading of a Max. Therm. on the 27th	65.3	57.2
Lowest Reading of a Min. Therm. on the 16th	25.0	22.4
Range of Thermometer Readings.....	40.3	34.9
Mean of all the Highest Readings	52.9	47.2
Mean of all the Lowest Readings	34.7	34.0
Mean Daily Range	18.2	13.2
Deduced Monthly Mean (from Mean of Max. and Min.)	42.8	39.7
Mean Temperature from dry bulb.....	43.1	39.9
Adopted Mean Temperature.....	43.0	39.8
Mean Temperature of Evaporation	40.6	37.9
Mean Temperature of Dew Point	37.7	35.4
Mean elastic force of Vapour	0.226 in	0.205 in
Mean weight of Vapour in a cub. ft. of air.....	2.6 gr	2.4 gr
Mean additional weight required for saturation...	0.6 gr	0.5 gr
Mean degree of Humidity (saturation 1.00) ...	0.82	0.85
Mean weight of a cubic foot of air	543.7 gr	546.7 gr
Fall of Rain	3.902 in	3.094 in
Number of days on which Rain fell	14	17.3

No. of days in the month on which the prevailing wind was	N	NE	E	SE	S	SW	W	NW
	0	6	3	1	2	4	14	1
Mean Velocity in miles per hour	0	6.1	4.5	7.1	18.1	16.6	13.5	2.5
Total No. of miles for each Direction.	0	876	322	170	867	1590	4530	59

The total number of miles registered during the month was 8414.
The max. Velocity of the wind was 47 miles per hour. Direction S.S.W., on the 1st, at 9 a.m.

MARCH, 1894.

Mean amount of Cloud (an overcast sky being indicated by 10·0)	5·8
In the month of March, the highest reading of the Barometer during 47 years, was on the 6th, in 1852, and was	.. 30·401
The lowest	„ 31st, 1860 „ .. 28·199
The highest Temperature	„ 25th, 1871 „ .. 68 0
The lowest	„ „ 6th, 1886 „ .. 11·5
The highest adopted mean temperature of the month, 1871..	44·0
The lowest	„ „ 1855 and 1892 .. 35·6

An average month except for the temperature, which was 3·2 above the mean. The rainfall was nearly all in the first half of the month, with a generally low barometric pressure; the latter half being fine with high barometer readings.

Ground frost on 23 days. Snow once. Hail on 5 days. Fine Aurora borealis seen on the 30th.

APRIL, 1894.

Results of Observations taken during the Month.	Mean for the last 47 years.	
Mean Reading of the Barometer	29.443	29.485
Highest ,, on the 30th	29.945	29.969
Lowest ,, on the 16th	28.839	28.804
Range of Barometer Readings	1.106	1.165
Highest Reading of a Max. Therm. on the 11th	68.6	66.2
Lowest Reading of a Min. Therm. on the 19th	31.1	28.1
Range of Thermometer Readings	37.5	38.1
Mean of all the Highest Readings.....	57.9	55.9
Mean of all the Lowest Readings	40.1	37.8
Mean Daily Range.....	17.8	18.1
Deduced Monthly Mean (from Mean of Max. and Min.).....	47.5	44.4
Mean Temperature from Dry Bulb	47.6	44.6
Adopted Mean Temperature	47.6	44.5
Mean Temperature of Evaporation	44.6	41.7
Mean Temperature of Dew Point	41.3	38.1
Mean elastic force of Vapour	0.260in	0.235in
Mean weight of Vapour in a cub. ft. of air ..	3.0gr	2.7gr
Mean additional weight required for saturation	0.7gr	0.7gr
Mean degree of Humidity (saturation 1.00)..	0.79	0.80
Mean weight of a cubic foot of air.....	537.9gr	542.0gr
Fall of Rain.....	1.925in	2.258in
Number of Days on which rain fell	18	14.6

		2	11	5	3	4	3	2
Mean Velocity in miles per hour	7.0	14.2	9.8	15.0	14.9	6.1	3.2	0
Total No. of miles for each Direction								

Anemograph dismantled.

The numbers in the table are the means of eye observations, taken daily at 8, 9, and 10 a.m. noon, 2, 4, and 9 p.m.

APRIL, 1894.

Mean amount of Cloud (an overcast sky being indicated by 10·0)	6·9
In the month of April, the highest reading of the Barometer during 47 years, was on the 17th, in 1887, and was.....	30 251
The lowest ,, 20th, 1868 ,,	28 358
The highest Temperature 14th, 1852 ,,	74·1
The lowest ,, 13th, 1892 ,,	20·8
The highest adopted mean temperature of the month, 1865	48 5
The lowest ,, ,, 1879	40·7

The mean temperature shows a comparatively warm month; but it was a degree less than in April of last year, while the rainfall was an inch more on fewer days. The general changes of barometric pressure are shown by three wave crests about the 5th, 20th, and 30th, with low hollows about the 16th and 26th. Ground frost on 12 days. Hail on one day. Lunar halo on one day.

MAY, 1894.

Results of Observations taken during the Month.	Mean for the last 47 years.	
Mean Reading of the Barometer.....	29.532	29.505
Highest ,, on the 24th.....	30.044	29.944
Lowest ,, on the 28th.....	29.092	28.940
Range of Barometer Readings.....	0.952	1.004
Highest Reading of a Max. Therm. on the 25th	64.4	71.9
Lowest Reading of a Min. Therm. on the 20th	27.0	31.3
Range of Thermometer Readings	37.4	40.6
Mean of all the Highest Readings	56.9	59.7
Mean of all the Lowest Readings	38.6	42.0
Mean Daily Range	18.3	17.7
Deduced Monthly Mean (from Mean of Max. and Min.)	46.1	49.0
Mean Temperature from Dry Bulb.....	47.0	49.5
Adopted Mean Temperature	46.6	49.3
Mean Temperature of Evaporation	42.8	46.1
Mean Temperature of Dew Point	38.6	42.5
Mean elastic force of Vapour	0.233in	0.276in
Mean weight of Vapour in a cub. ft. of air	2.7gr	2.3gr
Mean additional weight required for saturation	1.0gr	0.9gr
Mean degree of Humidity (saturation 1.00)..	0.74	0.76
Mean weight of a cubic foot of air.....	540.6gr	537.0gr
Fall of Rain	3.158in	2.635in
Number of days on which Rain fell.....	22	15.4

	4	8	1	2	0	5	9	2
Mean Velocity in miles per hour	5.0	9.4	10.0	12.3	0	13.2	14.3	13.0
Total No. of miles for each Direction								

Anemograph Dismounted.

The numbers in the table are the means of eye observations taken daily at 8, 9, and 10 a.m. Noon, 2, 4, and 9 p.m.

MAY, 1894.

Mean amount of Cloud (an overcast sky being indicated by 10·0)	7·6
In the month of May, the highest reading of the Barometer	
during 47 years, was on the 22nd in 1855, and was	30·124
The lowest " 28th, 1877 " 28·559
The highest Temperature 19th, 1864 " 82·5
The lowest " 4th, 1855 " 23·5
The highest adopted mean temperature of the month, 1848	55·1
The lowest " " 1855	45·0

A cold wet month, beginning with a high but falling barometer. The falling continued till the 10th, when a fairly steady rise set in, and settled at a high pressure state from the 16th to the 25th with fine but cold weather. Ground frost on 13 days. Snow on one day. Hail on one day. Solar halo on one day.

JUNE, 1894.

Results of Observations taken during the Month.	Mean for the last 47 years.	
Mean Reading of the Barometer	29.577	29.541
Highest ,, on the 30th.....	30.033	29.894
Lowest ,, on the 2nd.....	29.161	29.033
Range of Barometer Readings	0.872	0.861
Highest Reading of a Max. Therm. on the 3rd	79.5	77.3
Lowest Reading of a Min. Therm. on the 6th	35.6	38.8
Range of Thermometer Readings	43.9	38.5
Mean of all the Highest Readings	65.7	65.7
Mean of all the Lowest Readings	47.6	47.9
Mean Daily Range	18.1	17.8
Deduced Monthly Mean (from Mean of Max. and Min)	54.9	55.0
Mean Temperature from Dry Bulb.....	54.2	55.0
Adopted Mean Temperature.....	54.6	55.0
Mean Temperature of Evaporation	51.1	52.0
Mean Temperature of Dew Point	47.8	48.6
Mean elastic force of Vapour	0.330in	0.354in
Mean weight of Vapour in a cub. ft. of air.....	3.8gr	3.9gr
Mean additional weight required for saturation..	1.1gr	0.9gr
Mean degree of Humidity (saturation 1.00) ..	0.77	0.79
Mean weight of a cubic foot of air	532.4gr	531.2gr
Fall of Rain	3.625in	3.622in
Number of days on which Rain fell.....	18	16.2

No. of days in the month on which the prevailing wind was	N	NE	E	SE	S	SW	W	NW
		1	6	1	1	1	9	7
Mean Velocity in miles per hour	5.2	10.3	7.4	3.6	6.3	15.8	8.7	12.5
Total No. of miles for each direction								

Anemograph Dismounted.

The numbers in the table are the means of eye observations taken daily at 8, 9, and 10 a.m. Noon, 2, 4, and 9 p.m.

JUNE, 1894.

Mean amount of Cloud (an overcast sky being indicated by 10·0)	7·7
In the month of June, the highest reading of the Barometer during 47 years, was on the 15th, in 1874, and was.....	30·219
The lowest ,, 23rd, 1893 ,, 	28·813
The highest Temperature 18th, 1893 ,, 	88·7
The lowest ,, 17th, 1892 ,, 	34·1
The highest adopted mean temperature of the month, 1858...	59·0
The lowest ,, ,, 1856 and 1860...	52·2

The first half of the month was wet, with lower readings of the barometer and thermometer. Fine and warm weather came with the generally higher pressure in the second half. But only the last five days showed a steady high barometer ; and these were very warm days, the maximum temperatures of the air increasing daily from 71°·2 to 79°·5.

JULY, 1894.

Results of Observations taken during the Month	Mean for the last 47 years.	
Mean Reading of the Barometer	29.447	29.502
Highest " on the 1st	29.955	29.879
Lowest " on the 12th.....	28.870	28.991
Range of Barometer Readings	1.085	0.888
Highest Reading of a Max. Therm. on the 1st	80.5	78.8
Lowest Reading of a Min. Therm. on the 13th	43.2	42.1
Range of Thermometer Readings	37.3	36.7
Mean of all the Highest Readings	70.2	67.8
Mean of all the Lowest Readings.	51.3	50.7
Mean Daily Range	18.9	17.1
Deduced Monthly Mean (from Mean of Max. and Min.)	59.0	57.7
Mean Temperature from Dry Bulb.....	58.2	57.8
Adopted Mean Temperature	58.6	57.8
Mean Temperature of Evaporation	55.4	54.8
Mean Temperature of Dew Point.....	52.6	52.1
Mean elastic force of Vapour.....	0.396 in	0.389 in
Mean weight of Vapour in a cubic ft. of air	4.4gr	4.5gr
Mean additional weight required for saturation	1.1gr	1.0gr
Mean degree of Humidity (saturation 1.00) ..	0.80	0.82
Mean weight of a cubic foot of air	526.9gr	527.3gr
Fall of Rain	4.329 in	4.224 in
Number of days on which Rain fell.....	18	18.1

Anemograph dismantled.

The numbers in the table are the means of observations taken daily at 8, 9, and 10 a.m., noon, 2, 4, and 9 p.m.

JULY, 1894.

Mean amount of Cloud (an overcast sky being indicated by 10·0) 7·5

In the Month of July, the highest reading of the Barometer

during 47 years, was on the 24th, in 1868, and was 30·112

The lowest ,, 15th, 1877 ,, 28·564

The highest Temperature 22nd, 1873 ,, 88·2

The lowest ,, 1st, 1857 ,, 36·0

The highest adopted mean temperature of the month, 1852 63·0

The lowest ,, ,, 1888 54·5

The high barometric pressure at the end of last month fell steadily at an average rate of 0·1 inch, to the lowest reading of the month on the 12th. Rain fell on four of these days to the amount of 1·16 inch; but no rain fell on the 10th or 11th, and only 0·2 inch fell during the low pressure condition from the 10th to the 14th inclusive. The barometer remained fluctuating below 29·5 till the 22nd, and between 29·5 and 29·72 the rest of the month.

AUGUST, 1894.

Results of Observations taken during the Month	Mean for the last 47 years	
Mean Reading of the Barometer.....	29.463	29.488
Highest " on the 29th	29.854	29.885
Lowest " on the 15th	28.893	28.947
Range of Barometer Readings	0.961	0.938
Highest Reading of a Max. Therm. on the 8th	68.9	77.0
Lowest Reading of a Min. Therm. on the 20th	40.0	41.2
Range of Thermometer Readings	28.9	35.8
Mean of all the Highest Readings.....	64.1	67.2
Mean of all the Lowest Readings	49.8	56.4
Mean Daily Range.....	14.3	16.8
Deduced Monthly Mean (from Mean of Max. and Min.) ..	55.5	57.1
Mean Temperature (deduced from Dry Bulb)	55.7	57.5
Adopted Mean Temperature	55.6	57.3
Mean Temperature of Evaporation ..	53.2	54.5
Mean Temperature of Dew Point	51.0	51.8
Mean elastic force of Vapour	0.375 in	0.387 in
Mean weight of Vapour in a cub. ft. of air ...	4.2 gr	4.3 gr
Mean additional weight required for saturation	0.8 gr	0.9 gr
Mean degree of Humidity (saturation 1.00)...	0.84	0.82
Mean weight of a cubic foot of air	529.1 gr	527.4 gr
Fall of Rain	8.377 in	5.069 in
Number of days on which Rain fell	23	19.1

No. of days in the month on which the prevailing wind was	N	NE	E	SE	S	SW	W	NW
	4	2	0	0	0	10	15	0
Mean Velocity in miles per hour	6.8	6.2	0	0	0	9.8	11.7	0
Total No. of miles for each Direction.	649	491	0	0	0	2350	4209	0

The total number of miles registered during the month was 7699.
The max. Velocity of the wind was 30 miles per hour. Direction W.S.W. on the 15th at noon.

AUGUST, 1894.

Mean amount of Cloud (an overcast sky being indicated by 10·0)	8·9
In the month of August, the highest reading of the Barometer	
during 47 years, was on the 21st, in 1874, and was 30·114
The lowest	„ 31st, 1876 „ 28·555
The highest Temperature	2nd, 1868 „ 88·0
The lowest	„ 13th, 1887 „ 33·4
The highest adopted mean temperature of the month, 1857 & '84	61·0
The lowest	„ „ 1848.... 52·5

A very wet month. Over an inch of rain fell on the 1st and 14th, nearly an inch on the 2nd and 8th, and over $\frac{1}{2}$ an inch on the 12th, 19th, and 25th. The barometer remained generally low till the 24th, when it rose above 29·7 inches for the first time, and remained steady with finer weather to the end of the month. The weather generally was colder than would appear from the mean temperature, the highest temperature in the shade being 8° below the average maximum, and the solar radiation thermometer showing a mean daily maximum only 3° higher than that of April.

SEPTEMBER, 1894.

Results of Observations taken during the Month.	Mean for the last 47 years.	
Mean Reading of the Barometer	29.773	29.518
Highest .., on the 30th	30.130	30.026
Lowest .., on the 25th.....	29.343	28.854
Range of Barometer Readings	0.787	1.172
Highest Reading of a Max. Therm. on the 15th	69.2	72.4
Lowest Reading of a Min. Therm. on the 27th	31.0	36.4
Range of Thermometer Readings	38.2	36.0
Mean of all the Highest Readings.....	62.1	62.2
Mean of all the Lowest Readings.....	44.4	46.9
Mean Daily Range	17.7	15.3
Deduced Monthly Mean (from Mean of Max. and Min.)	52.0	53.4
Mean Temperature from dry bulb	52.0	54.0
Adopted Mean Temperature	52.0	53.7
Mean Temperature of Evaporation	48.6	50.9
Mean Temperature of Dew Point	45.1	48.3
Mean elastic force of Vapour	0.301in	0.338in
Mean weight of Vapour in a cub. ft. of air	3.4gr	4.0gr
Mean additional weight required for saturation	1.0gr	0.8gr
Mean degree of Humidity (saturation 1.00)	0.78	0.82
Mean weight of a cubic foot of air	530.0gr	532.4gr
Fall of Rain	0.801ir.	4.599 in
Number of Days on which rain fell	6	17.9

No. of days in the month on which the prevailing wind was	N	NE	E	SE	S	SW	W	NW
		12	9	3	0	0	1	4
Mean Velocity in miles per hour	5.2	5.7	8.5	0	0	5.4	7.8	12.3
Total No. of miles for each Direction	1500	1239	612	0	0	130	750	294

The total number of miles registered during the month was 4525.
 The max. Velocity of the wind was 24 miles per hour. Direction E.N.E., on the 22nd, at 10 p.m.

SEPTEMBER, 1894.

Mean amount of Cloud (an overcast sky being indicated by 10·0)				5·8
In the month of September, the highest reading of the Barometer during 47 years, was on the 15th, in 1851, and was ...30·274				
The lowest	"	2nd, 1883	"	...28·323
The highest Temperature		6th, 1868	"	... 85·0
The lowest	"	25th, 1885, and 30th, 1888..		29·8
The highest adopted mean temperature of the month, 1865 ..				59·1
The lowest	"	"	1863 ..	50·9

A remarkably fine and dry month; but with a mean temperature below the average, owing to the Northerly winds all through the month. The mean reading of the barometer was $\frac{1}{4}$ inch above the average, and was nearly equal to the highest reading of August. The rainfall was only one-fifth of the average. Ground frost on 4 days. Hail on one day.

OCTOBER, 1894.

Results of Observations taken during the Month.	Mean for the last 47 years.	
Mean Reading of the Barometer	29.485	29.423
Highest ,, on the 1st	30.117	30.015
Lowest ,, on the 24th.....	28.346	28.639
Range of Barometer Readings	1.771	1.376
Highest Reading of a Max. Therm. on the 11th	63.0	64.2
Lowest Reading of a Min. Therm. on the 21st	25.5	29.0
Range of Thermometer Readings	37.5	35.2
Mean of all the Highest Readings	55.2	54.6
Mean of all the Lowest Readings	41.0	41.6
Mean Daily Range ..	14.2	13.0
Deduced Monthly Mean (from Mean of Max. and Min.)	47.1	47.2
Mean Temperature from Dry Bulb.....	47.2	47.7
Adopted Mean Temperature	47.2	47.4
Mean Temperature of Evaporation.....	46.0	45.2
Mean Temperature of Dew Point	44.7	42.9
Mean elastic force of Vapour	0.295 in	0.276 in
Mean weight of Vapour in a cub. ft. of air	3.4 gr	3.2 gr
Mean additional weight required for saturation...	0.4 gr	0.6 gr
Mean degree of Humidity (saturation 1.00)...	0.92	0.84
Mean weight of a cubic foot of air	538.7 gr	537.4 gr
Fall of Rain	4.217 in	5.067 in
Number of days on which Rain fell	15	21.7

No. of days in the month on which the prevailing wind was	N	NE	E	SE	S	SW	W	NW
	7	11	1	1	2	4	3	2
Mean Velocity in miles per hour	7.0	6.1	10.6	8.7	10.8	10.7	6.8	2.0
Total No. of miles for each Direction	1173	1599	255	209	887	1028	492	94

The total number of miles registered during the month was 5737.
 The max. Velocity of the wind was 42 miles per hour. Direction S.W., on the 24th at 10 p.m.

OCTOBER, 1894.

Mean amount of Cloud an (overcast sky being indicated by 10·0)	7·9
In the month of October, the highest reading of the Barometer during 47 years; was on the 5th, in 1884, and was	30·306
The lowest ,, 19th, 1862 ,, 	28·139
The highest Temperature 9th, 1869 ,, 	72·8
The lowest ,, 24th, 1892 ,, 	22·8
The highest adopted mean temperature of the month, 1861 & '76	51·6
The lowest ,, ,, 1880	43·1

The high barometric pressure of last month was maintained till the 17th of October, when a decided fall commenced; but the northerly winds prevailed up to the 23rd, when the mercury went down rapidly before a moderate gale of wind on the 24th, and heavy rain fell on the 23rd and three following days, to the amount of 2·8 inches.

Ground frost on 5 days. Hail on one day.

NOVEMBER, 1894.

Results of Observations taken during the Month.	Mean for the last 47 years.	
Mean Reading of the Barometer	29·467	29·320
Highest " on the 30th	30·134	30·053
Lowest " on the 14th	28·502	28·563
Range of Barometer Readings	1·632	1·490
Highest Reading of a Max. Therm. on the 2nd	62·0	55·7
Lowest Reading of a Min. Therm. on the 30th	29·0	25·4
Range of Thermometer Readings	33·0	30·3
Mean of all the Highest Readings	52·1	47·1
Mean of all the Lowest Readings	40·5	36·3
Mean Daily Range	11·6	10·8
Deduced Monthly Mean (from Mean of Max. and Min.)	45·9	41·3
Mean Temperature from Dry Bulb.....	45·1	41·6
Adopted Mean Temperature.....	45·5	41·4
Mean Temperature of Evaporation.....	44·2	39·2

Mean additional weight required for saturation	0·5gr	0·4 gr
Mean degree of Humidity (saturation 1·00) ..	0·90	0·87
Mean weight of a cubic foot of air	540·7gr	544·9gr
Fall of Rain	3·546 in	4·281 in
Number of days on which Rain fell	20	19·6

No. of days in the month on which the prevailing wind was	N	NE	E	SE	S	SW	W	NW
	0	0	4	0	11	11	4	0
Mean Velocity in miles per hour	0	0	9·4	0	13·9	7·5	14·1	0
Total No. of miles for each Direction	0	0	906	0	3676	2087	1352	0

The total number of miles registered during the month was 8021.
The max. Velocity of the wind was 42 miles per hour. Direction S. by E., on the 14th, at 2 a.m.

NOVEMBER, 1894.

Mean amount of Cloud (an overcast sky being indicated by 10·0)	8·3
In the month of November, the highest reading of the Barometer during 47 years was on the 12th, in 1857, and was .. 30·350	
The lowest	11th, 1891 .. 27·938
The highest Temperature	2nd, 1894 .. 62·0
The lowest	17th, 1861 .. 19·1
The highest adopted mean temperature of the month, 1881	47·0
The lowest	1851 36·7

A warm November with a mean temperature 4·1 above the average. The mean temperature of the first three days was above the mean temperature of last August. The barometer remained low until the 17th; it reached its lowest dip on the 14th, with an inch of rain on the 13th, and then started on a steady rise from 28·57 on the 14th to 29·97 on the 21st, and remained high through the rest of the month.

DECEMBER, 1894.

Results of Observations taken during the Month.		Mean for the last 47 years.						
Mean Reading of the Barometer	29.524	29.461						
Highest " on the 27th ..	30.246	30.076						
Lowest " on the 22nd ..	28.482	28.595

<p>The total number of miles registered during the month was 8.077. The max. Velocity of the wind was 72 miles per hour. Direction W. by S., on the 22nd, at 9.10 a.m.</p>								

DECEMBER, 1894.

Mean amount of Cloud (an overcast sky being indicated by 10·0) 6·9			
In the month of December, the highest reading of the Bar-			
ometer during 47 years, was on the 22nd, in 1849, and was 30·378			
The lowest	„	8th, 1886	„ 27·350
The highest Temperature		9th, 1876	„ 58·1
The lowest	„	24th, 1860	„ 6·7
The highest dopted mean temperature of the month, 1857 44·6			
The lowest	„	1878	„ 30·3

The barometer began a rather rapid fall on the 3rd, and then remained in an unsteady state, oscillating moderately about the mean height until the 16th, when the changes became greater :— 29·8 inches on the 16th, 28·9 on the 18th, 29·8 on the 20th, and 28·5 on the 22nd. With the last depression came the heavy gale of wind, the severest recorded by the Robinson anemograph, since it was mounted in 1867. A more rapid fall of the Mercury, set in at 4 p.m. on the 21st, to the lowest reading 28·50 at 7 a.m. on the 22nd, two hours before the gale was at its height, at 72 miles an hour. It was already blowing strongly at midnight, and freshened to a moderate gale (42 miles per hour) at 1 a.m., steadily increasing to a strong gale (58 miles) at 6 a.m., which it maintained till 4 p.m., rising to nearly hurricane speed at 9 a.m., and keeping up 60 miles and over between 8 a.m. and 2 p.m., with a rapidly rising barometer.

The barometer stood at 30 inches on the 25th, and continued to rise to 30½ on the 28th, when another fall set in with another westerly gale, having two maxima of velocity at 50 miles an hour, one at 9 p.m. ; and the other at the following 7 a.m.

Summary of Observations FOR 1894.

	Mean for the last 47 years.
Mean Reading of the Barometer	29·500
Highest ,, on December 27th ..	30·246
Lowest ,, on October 22nd ²⁴	28·346
Range of Barometer Readings	1·900
Highest Reading of a Max. Term. on July 1st	80·5
Lowest Reading of a Max. ^{min.} Term. on Jan. 5th	10·0
Range of Thermometer Readings	70·5
Mean of all the Highest Readings	56·0
Mean of all the Lowest Readings.....	40·7
Mean Daily Range	15·3
Deduced yearly Mean (from Mean of Max. and Min.)	47·3
Mean Temperature of dry bulb.....	47·3
Adopted Mean Temperature	47·3
Mean Temperature of Evaporation	44·9
Mean Temperature of Dew Point.....	42·3
Mean elastic force of Vapour.....	0·276in
Mean weight of Vapour in a cubic foot of air	3·1gr
Mean additional weight required for saturation	0·7gr
Mean degree of Humidity (saturation 1·00) ..	0·83
Mean weight of a cubic foot of air	538·5gr
Total fall of rain in the Year.....	50·294in
Number of days per Month on which rain fell	18·8

The Maximum monthly mean height of the Barometer was February, 1891, and was	29·997
The Minimum ,, ,, in December, 1868, and was	28·984
The Maximum yearly mean height of the Barometer was in 1887, and was	29·582
The Minimum ,, ,, in 1866, and was	29·389

SUMMARY, 1894.

The greatest monthly range of the Barometer was in January, 1884, and was.....	2·409
The least „ „ in July, 1852, and was	0·505
The highest reading, of the Barometer, during 47 years, was on January 18th, 1882, and was	30·480
The lowest „ „ on December 8th, 1886, and was	27·350
Extreme range	3·130
The highest temperature was on June 18th, 1893, and was..	88·7
The lowest „ „ January 15th, 1881.....	4·6
The highest adopted mean temperature of a month, July 1868	62·4
The lowest „ „ „ February, 1855..	28·6

MONTHLY MAGNETICAL OBSERVATIONS
TAKEN AT THE
COLLEGE OBSERVATORY, STONYHURST, 1894.

THE Horizontal, Vertical, and Total Forces are calculated to English measure ; one foot, one second of mean solar time, and one grain being assumed as the units of space, of time, and of mass.

The Vertical and Total Forces are obtained from the absolute measures of the Horizontal Force, and of the Dip.

In the observations of Deflection and Vibration, taken each month for absolute measure of Horizontal Force, the same magnet has always been employed.

The moment of inertia of the magnet with its stirrup, for different degrees of temperature, and the co-efficients in the corrections required for the effects of temperature and of terrestrial magnetic induction on the magnetic moment of the magnet, were determined at the Kew Observatory by the late Mr. Welsh.

The moment of inertia of the magnet with its stirrup, using the grain and foot as the units of mass and of linear measure is 5.27303. Its rate of increase for increase of temperature is 0.00073 for every 10° of Fahr.

The weight of the magnet with its stirrup is approximately 825 grains, and the length of the magnet is nearly 3.94 inches. The moment of inertia was determined, independently of the weight and dimensions, by the method of vibration, with and without a known increase of the moment of inertia.

The temperature corrections have always been obtained from the formula $q(t^\circ - 35^\circ + q'(t^\circ - 35^\circ)^2$, where t° is the observed temperature and 35° Fahr. the adopted standard temperature. The values of the co-efficient q and q' are respectively 0.0001128 and 0.000000436

The induction co-efficient μ is 0.000244.

The correction for error of graduation of the Deflection bar at 1.0 foot is + 0.00004 ft, at 1.3 + 0.000064 ft.

The observed times of vibration are entered in the Table without corrections.

The time of one vibration has been obtained each month from the mean of twelve determinations of the time of 200 vibrations.

The angles of deflection are each the mean of two sets or readings.

In deducing from these observations the ratio and product of the magnetic moment m of the magnet, and the earth's horizontal magnetic intensity X , the induction and temperature corrections have always been applied, and the observed time of vibration has been corrected for the effect of torsion of the suspending thread; but no correction has been required for the rate of the chronometer, or for the arc of vibration, the former having been always under 1.5s and the latter never over 50'.

The average deflection of the magnet caused by a twist of the torsion circle through 90° has been about 11'.6 of arc.

In the calculations of the ratio $\frac{m}{X}$, the third and subsequent

terms of the series $1 + \frac{P}{r^2} + \frac{Q}{r^4} + \dots$ &c., have always been omitted.

The value of the constant P was found to be -0.00217 .

The Declination observations have been taken once a week

DATES OF MAGNETIC DISTURBANCES, 1894.

The disturbances are divided generally into three classes, *small*, *moderate*, and *greater*; these are indicated by the initial letters of the classes, and the letter c denotes *calm*. Very great disturbances are marked vg. The days are reckoned astronomically, from noon to noon. The asterisk signifies that the record was partly or wholly lost, according as it stands with or without an initial letter.

THE HISTORY OF THE UNITED STATES OF AMERICA

The history of the United States of America is a story of growth and change. It begins with the first settlers who came to the eastern coast of North America in the early 17th century. These settlers, known as the Pilgrims, were seeking a better life and a place where they could practice their religion freely. They established the Plymouth colony in 1620, which became one of the first permanent English settlements in North America.

Over the years, more settlers came to the continent, and the colonies grew. By the mid-18th century, the colonies had become more independent and were demanding more rights from the British government. This led to a series of conflicts, culminating in the American Revolutionary War (1775-1783). The war resulted in the colonies gaining their independence and becoming the United States of America.

The new nation faced many challenges, including the need to establish a strong government and a common identity. The Constitution was drafted in 1787, and the Bill of Rights was added in 1791. These documents laid the foundation for the United States as a democratic republic.

In the 19th century, the United States expanded westward, acquiring vast territories. This expansion led to the discovery of gold and other resources, which attracted many settlers. However, it also led to conflicts with Native Americans and the issue of slavery. The Civil War (1861-1865) was fought over the issue of slavery, and it resulted in the abolition of slavery and the preservation of the Union.

The 20th century was a time of great change and progress. The United States emerged as a world superpower after World War II. It played a leading role in the development of the United Nations and other international organizations. The country also experienced significant social and economic changes, including the civil rights movement and the space program.

Today, the United States is a diverse and dynamic nation. It continues to face challenges, but it remains a leader in the world. The history of the United States is a testament to the power of democracy and the pursuit of the American dream.

APPENDIX

RESULTS

OF

METEOROLOGICAL OBSERVATIONS

TAKEN AT

ST. IGNATIUS' COLLEGE, MALTA

BY THE

REV. J. DOBSON, S.J.

1894.

ST. IGNATIUS' COLLEGE, MALTA.

Lat. 35° 55' N. Long. 14° 29' E. Barometer Readings
reduced to 32° F. at sea level.

METEOROLOGICAL REPORT.

JANUARY, 1894.

Results of Observations taken during the Month.	Average 10 yrs.	
Mean Reading of the Barometer inches	30·076	30·056
Highest „ on the 16th „	30·329	30·425
Lowest „ on the 3rd „	29·672	29·578
Range of Barometer Readings	0·657	0·847
Highest Reading of a Max. Therm. on the 25th	63·8	64·9
Lowest Reading of a Min. Therm. on the 18th	42·0	41·8
Range of Thermometer Readings	21·8	23·1
Greatest Range in 24 hours on the 25th	18·6	18·4
Mean of all the Highest Readings	59·1	59·0
Mean of all the Lowest Readings	47·4	48·6
Mean Daily Range	11·7	10·4
Mean Temperature (deduced from Max. & Min.)	52·6	53·1
Mean Temperature (deduced from Dry Bulb)	52·4	52·9
Adopted Mean Temperature	52·5	53·0
Mean Temperature of Evaporation	48·6	48·7
Mean Temperature of Dew Point	46·0	45·6
Mean elastic force of Vapour inches	0·311	0·306
Mean weight of Vapour in a cub. ft. of air grains	3·5	3·5
Mean additional weight required for saturation „	0·7	0·9
Mean degree of Humidity	82	80
Mean weight of a cubic foot of air grains	542·7	542·5
Fall of rain inches	3·995	3·594
Number of Days on which rain fell	19	13
Mean amount of Cloud (an overcast sky=10)	7·2	5·0
Total number of miles of Wind indicated	5747	8500
Mean Velocity of Wind per hour miles	7·8	11·4

FEBRUARY.

Results of Observations taken during the Month	Average 10 yrs.	
Mean Reading of the Barometer.....inches	30·091	30·020
Highest ,, on the 3rd ,,	30·434	30·320
Lowest ,, on the 20th ,,	29·812	29·623
Range of Barometer Readings	0·622	0·697
Highest Reading of a Max. Therm. on the 28th	64·8	67·1
Lowest Reading of a Min. Therm. on the 16th	42·8	41·7
Range of Thermometer Readings	22·0	25·4
Greatest Range in 24 hours on the 28th	17·8	19·6
Mean of all the Highest Readings.....	58·7	60·1
Mean of all the Lowest Readings	49·9	48·9
Mean Daily Range.....	8·8	11·2
Mean Temperature(deduced from Max.& Min.)	53·3	53·5
Mean Temperature (deduced from Dry Bulb)	54·2	53·8
Adopted Mean Temperature	53·8	53·6
Mean Temperature of Evaporation	49·8	49·5
Mean Temperature of Dew Point	47·1	46·6
Mean elastic force of Vapour	0·324	0·319
Mean weight of Vapour in a cub. ft. of air grains	3·7	3·6
Mean additional weight required for saturation,,	0·8	0·8
Mean degree of Humidity	84	82
Mean weight of a cubic foot of air..grains	541·5	540·8
Fall of Rain	4·400	2·087
Number of days on which Rain fell	8	10
Mean amount of Cloud (an overcast sky=10)..	6·5	4·7
Total number of miles of Wind indicated ..	9813	7675
Mean Velocity of Wind per hour	14·6	11·3

MARCH.

Results of Observations taken during the month.	Average 10 yrs.	
Mean Reading of the Barometer..... inches	29.982	29.989
Highest ,, on the 29th ,,	30.317	30.363
Lowest ,, on the 31st ,,	29.601	29.496
Range of Barometer Readings	0.716	0.867
Highest Reading of a Max. Therm. on the 14th	68.3	74.7
Lowest Reading of a Min. Therm. on the 29th	41.7	42.9
Range of Thermometer Readings.....	26.6	31.8
Greatest Range in 24 hours on the 29th	20.1	23.1
Mean of all the Highest Readings	62.0	63.3
Mean of all the Lowest Readings	51.2	50.8
Mean Daily Range	10.8	12.5
Mean Temperature (deduced from Max. & Min.)	55.8	56.2
Mean Temperature (deduced from Dry Bulb)	54.0	55.6
Adopted Mean Temperature.....	54.9	55.9
Mean Temperature of Evaporation	50.0	51.9
Mean Temperature of Dew Point	46.1	48.7
Mean elastic force of Vapourinches	0.312	0.345
Mean weight of Vapour in a cub. ft. of air grains	3.5	3.9
Mean additional weight required for saturation ,,	1.2	1.1
Mean degree of Humidity	75	79
Mean weight of a cubic foot of airgrains	538.5	537.0
Fall of Rain	1.490	0.896
Number of days on which Rain fell	11	7
Mean amount of Cloud (an overcast sky=10)	5.8	4.4
Total number of miles of Wind indicated.....	7322	8175
Mean Velocity of Wind per hourmiles	9.8	10.9

APRIL.

Results of Observations taken during the Month.		Average 10 yrs.
Mean Reading of the Barometer.....inches	29·975	29·925
Highest „ on the 15th „	30·219	30·256
Lowest „ on the 3rd „	29·577	29·499
Range of Barometer Readings	0·642	0·757
Highest Reading of a Max. Therm. on the 22nd	72·5	77·1
Lowest Reading of a Min. Therm. on the 7th	47·0	48·0
Range of Thermometer Readings	25·5	29·1
Greatest Range in 24 hours on the 26th.....	19·6	22·1
Mean of all the Highest Readings.....	66·8	67·4
Mean of all the Lowest Readings	53·9	54·3
Mean Daily Range	12·9	13·1
Mean Temperature (deduced from Max. & Min)	59·4	59·9
Mean Temperature (deduced from Dry Bulb)	59·3	59·6
Adopted Mean Temperature	59·3	59·8
Mean Temperature of Evaporation	56·4	55·6
Mean Temperature of Dew Point	53·8	52·1
Mean elastic force of Vapour	0·415	0·389
Mean weight of Vapour in a cub. ft. of air grains	4·7	4·4
Mean additional weight required for saturation „	1·0	1·4
Mean degree of Humidity	83	77
Mean weight of a cubic foot of airgrains	532·1	531·0
Fall of Rain	1·513	0·768
Number of Days on which rain fell	8	6
Mean amount of Cloud (an overcast sky=10)	5·6	4·3
Total number of miles of Wind indicated....	7502	8473
Mean Velocity of Wind per hour	10·4	11·8

MAY.

Results of Observations taken during the Month.	Average 10 yrs.	
Mean Reading of the Barometer.....inches	29.944	29.991
Highest ,, on the 11th ,,	30.119	30.180
Lowest ,, on the 25th ,,	29.710	29.614
Range of Barometer Readings....., ,	0.409	0.566
Highest Reading of a Max. Therm. on the 28th	77.5	82.6
Lowest Reading of a Min. Therm. on the 3rd	51.7	53.9
Range of Thermometer Readings	25.8	28.7
Greatest Range in 24 hours on the 28th	21.2	24.1
Mean of all the Highest Readings	71.8	72.6
Mean of all the Lowest Readings	58.5	58.4
Mean Daily Range	13.3	14.2
Mean Temperature (deduced from Max. & Min.)	64.1	64.3
Mean Temperature (deduced from Dry Bulb)..	64.4	63.8
Adopted Mean Temperature	64.2	64.1
Mean Temperature of Evaporation	60.7	60.0
Mean Temperature of Dew Point.....	57.2	56.4
Mean elastic force of Vapour.....inches	0.469	0.456
Mean weight of Vapour in a cub. ft. of air grains	5.2	5.0
Mean additional weight required for saturation ,,	1.6	1.7
Mean degree of Humidity	81	75
Mean weight of a cubic foot of airgrains	525.2	527.1
Fall of Rain	0.015	0.761
Number of days on which Rain fell	1	4
Mean amount of Cloud (an overcast sky.=10)	5.1	3.5
Total number of miles of Wind indicated....	8163	7372
Mean Velocity of Wind per hour.....miles	11.0	9.9

JUNE

Results of Observations taken during the Month.	Average 10 yrs.	
Mean Reading of the Barometerinches	30·071	30·009
Highest ,, on the 18th ,,	30·217	30·175
Lowest ,, on the 12th ,,	29·866	29·832
Range of Barometer Readings ,,	0·351	0·343
Highest Reading of a Max. Therm. on the 27th	89·3	91·0
Lowest Reading of a Min. Therm. on the 18th	55·8	59·2
Range of Thermometer Readings	33·5	31·8
Greatest Range in 24 hours on the 25th	26·3	25·7
Mean of all the Highest Readings	79·6	80·6
Mean of all the Lowest Readings	62·7	64·8
Mean Daily Range	16·9	15·8
Mean Temperature (deduced from Max & Min)	70·5	71·9
Mean Temperature (deduced from Dry Bulb)	70·5	71·2
Adopted Mean Temperature.....	70·5	71·6
Mean Temperature of Evaporation	65·1	65·9
Mean Temperature of Dew Point	60·4	61·7
Mean elastic force of Vapourinches	0·526	0·550
Mean weight of Vapour in a cub. ft. of air grains	5·6	6·0
Mean additional weight required for saturation ,,	2·4	2·4
Mean degree of Humidity	74	71
Mean weight of a cubic foot of airgrains	521·9	519·6
Fall of Rain	inches —	0·081
Number of days on which Rain fell.....	0	1
Mean amount of Cloud an overcast sky=10..	2·0	2·0
Total number of miles of Wind indicated....	5684	6213
Mean Velocity of Wind per hour.....miles	7·9	8·7

JULY.

Results of Observations taken during the Month	Average 10 yrs.	
Mean Reading of the Barometerinches	29·992	30 012
Highest " on the 1st "	30 156	30·155
Lowest " on the 26th "	29·798	29·844
Range of Barometer Readings	0·358	0 311
Highest Reading of a Max. Therm. on the 12th	96·8	97·2
Lowest Reading of a Min. Therm. on the 3rd	64·7	64·6
Range of Thermometer Readings	31·6	32·6
Greatest Range in 24 hours on the 11th ...	27·1	26·8
Mean of all the Highest Readings	87·6	86·8
Mean of all the Lowest Readings.	69·0	69·8
Mean Daily Range	18·6	17·0
Mean Temperature (deduced from Max.& Min)	77·8	77·8
Mean Temperature (deduced from Dry Bulb)	77·4	76·8
Adopted Mean Temperature	77·6	77·3
Mean Temperature of Evaporation	71·5	70·2
Mean Temperature of Dew Point.....	67·1	65·3
Mean elastic force of Vapour.....inches	0·664	0·625
Mean weight of Vapour in a cubic ft. of air grains	7·1	6·7
Mean additional weight required for saturation,,	3·2	3·4
Mean degree of Humidity	69	67
Mean weight of a cubic foot. of airgrains	512·5	513·8
Fall of Rain	inches	—
Number of days on which Rain fell.....	—	—
Mean amount of Cloud (an overcast sky=10)	1·9	1·7
Total number of miles of Wind indicated	4585	6077
Mean Velocity of Wind per.hour.....miles	6·2	8·2

AUGUST.

Results of Observations taken during the Month	Average 10 yrs.	
Mean Reading of the Barometerinches	30·031	30·010
Highest " on the 24th "	30·217	30·156
Lowest " on the 14th "	29·906	29·863
Range of Barometer Readings " "	0·311	0·298
Highest Reading of a Max. Therm. on the 30th	95·2	97·0
Lowest Reading of a Min. Therm. on the 23rd	65·2	66·2
Range of Thermometer Readings.....	30·0	30·8
Greatest Range in 24 hours on the 30th.....	24·3	26·2
Mean of all the Highest Readings.....	86·4	87·3
Mean of all the Lowest Readings.....	70·1	71·1
Mean Daily Range 	16·3	16·2
Mean Temperature (deduced from Max. & Min.)	77·6	78·4
Mean Temperature (deduced from Dry Bulb)	77·2	78·4
Adopted Mean Temperature 	77·4	78·4
Mean Temperature of Evaporation....	70·9	71·4
Mean Temperature of Dew Point.....	66·3	66·7
Mean elastic force of Vapourinches	0·646	0·653
Mean weight of Vapour in a cub. ft. of air grains	6·2	7·0
Mean additional weight required for saturation,,	3·1	3·3
Mean degree of Humidity 	69	67
Mean weight of a cubic foot of air.....grains	513·4	512·2
Fall of Rain inches	0·000	0·000
Number of days on which Rain fell.....	0	0
Mean amount of Cloud (an overcast sky=10)..	0·6	1·0
Total number of miles of Wind indicated	5862	5442
Mean Velocity of Wind per hour miles	7·9	7·3

SEPTEMBER.

Results of Observations taken during the Month.		Average 10 yrs.
Mean Reading of the Barometer ..inches	30·054	30·064
Highest " on the 12th "	30·245	30·246
Lowest " on the 30th "	29·837	29·849
Range of Barometer Readings.....	0·408	0·397
Highest Reading of a Max. Therm. on 5th & 14th	95·8	92·2
Lowest Reading of a Min. Therm. on the 23rd	65·0	62·9
Range of Thermometer Readings	30·8	29·3
Greatest Range in 24 hours on the 5th	29·0	23·0
Mean of all the Highest Readings.....	87·3	82·6
Mean of all the Lowest Readings.....	71·6	68·5
Mean Daily Range.....	15·7	14·1
Mean Temperature (deduced from Max & Min)	78·6	74·7
Mean Temperature (deduced from Dry Bulb)	76·6	74·5
Adopted Mean Temperature	77·6	74·6
Mean Temperature of Evaporation	71·8	68·9
Mean Temperature of Dew Point	68·4	64·8
Mean elastic force of Vapour	0·694	0·615
Mean weight of Vapour in a cub. ft. of air grains	7·0	6·7
Mean additional weight required for saturation ,,	2·8	2·6
Mean degree of Humidity	76	72
Mean weight of a cubic foot of air ..grains	514·2	517·3
Fall of Rain	0·234	1·375
Number of Days on which rain fell	1	5
Mean amount of Cloud (an overcast sky=10)	2·1	2·4
Total number of miles of Wind indicated....	5901	5630
Mean Velocity of Wind per hour	8·2	7·8

OCTOBER

Results of Observations taken during the Month.	Average 10 yrs.	
Mean Reading of the Barometer....inches	30.114	30.045
Highest ,, on the 23rd ,,	30.191	30.274
Lowest ,, on the 3rd ,,	29.831	29.727
Range of Barometer Readings	0.360	0.547
Highest Reading of a Max. Therm. on the 19th	90.1	87.4
Lowest Reading of a Min. Therm. on the 15th	59.4	55.7
Range of Thermometer Readings	30.7	31.7
Greatest Range in 24 hours on the 4th	20.1	19.6
Mean of all the Highest Readings	81.1	76.1
Mean of all the Lowest Readings	67.8	64.3
Mean Daily Range ..	13.3	11.8
Mean Temperature (deduced from Max. & Min.)	73.6	69.3
Mean Temperature (deduced from Dry Bulb)	72.6	68.4
Adopted Mean Temperature	73.1	68.9
Mean Temperature of Evaporation.....	68.5	64.2
Mean Temperature of Dew Point	65.3	60.7
Mean elastic force of Vapourinches	0.624	0.536
Mean weight of Vapour in a cub. ft. of air grains	6.8	5.8
Mean additional weight required for saturation ,,	1.9	1.7
Mean degree of Humidity	74	77
Mean weight of a cubic foot of air grains ..	519.8	523.4
Fall of Rain	1.622	3.013
Number of days on which Rain fell	4	8
Mean amount of Cloud (an overcast sky=10)	4.7	4.2
Total number of miles of wind indicated	5555	6802
Mean Velocity of Wind per hour.....miles	7.5	9.2

NOVEMBER.

Results of Observations taken during the Month.	Average 10 yrs.	
Mean Reading of the Barometerinches	30·066	30·076
Highest " on the 22nd ,,	30·236	30·328
Lowest " on the 10th ,,	29·585	29·727
Range of Barometer Readings	0·651	0·601
Highest Reading of a Max. Therm. on the 1st	78·6	76·1
Lowest Reading of a Min. Therm. on the 25th	52·5	49·0
Range of Thermometer Readings	26·1	27·1
Greatest Range in 24 hours on the 8th.....	19·1	18·5
Mean of all the Highest Readings	70·6	68·0
Mean of all the Lowest Readings	58·5	56·9
Mean Daily Range	12·1	11·1
Mean Temperature(deduced from Max. & Min.)	63·4	61·7
Mean Temperature (deduced from Dry Bulb)	62·3	61·2
Adopted Mean Temperature.....	62·8	61·5
Mean Temperature of Evaporation.....	58·1	56·9
Mean Temperature of Dew Point	51·3	53·8
Mean elastic force of Vapourinches	0·378	0·414
Mean weight of Vapour in a cub. ft. of air grains	4·8	4·7
Mean additional weight required for saturation,,	1·3	1·3
Mean degree of Humidity	80	79
Mean weight of a cubic foot of air.....grains	531·2	532·6
Fall of Rain	4·559	3·305
Number of days on which Rain fell	16	10
Mean amount of Cloud (an overcast sky=10)	6·6	4·8
Total number of miles of Wind indicated	5277	6809
Mean Velocity of Wind per hour.....miles	7·3	9·5

DECEMBER.

Results of Observations taken during the Month.	Average 10 yrs.	
Mean Reading of the Barometerinches	29·929	30·070
Highest " on the 19th ,,	30·265	30·414
Lowest " on the 31st ,,	29·490	29·582
Range of Barometer Readings..... ,,	0·775	0·832
Highest Reading of a Max. Therm. on 1st & 5th	68·9	68·5
Lowest Reading of a Min. Therm. on the 19th	43·2	44·0
Range of Thermometer Readings.....	25·7	24·5
Greatest Range in 24 hours on the 5th	18·7	17·2
Mean of all the Highest Readings	61·7	62·0
Mean of all the Lowest Readings	51·4	52·2
Mean Daily Range	10·3	9·8
Mean Temperature (deduced from Max. & Min.)	55·7	56·5
Mean Temperature (deduced from Dry Bulb)	55·9	56·6
Adopted Mean Temperature	55·8	56·3
Mean Temperature of Evaporation	51·3	51·9
Mean Temperature of Dew Point.....	47·7	48·7
Mean elastic force of Vapour..... inches	0·331	0·344
Mean weight of Vapour in a cub. ft. of air grains	3·8	3·9
Mean additional weight required for saturation,,	1·2	1·1
Mean degree of Humidity	87	79
Mean weight of a cubic foot of air....grains	538·2	538·8
Fall of Rain	7·291	3·653
Number of days on which Rain fell	22	14
Mean amount of Cloud (an overcast sky=10)	6·8	5·4
Total number of miles of Wind indicated....	8626	8291
Mean Velocity of Wind per hour.....miles	11·6	11·2

Summary of Observations FOR 1894.

Results of observations taken during the Year	Mean of 10 years 1883—1892	
Mean Reading of the Barometer inches	30.027	30.025
Highest ,, on February 3rd ..	30.434	30.505
Lowest ,, on December 31st ..	29.490	29.354
Range of Barometer Readings	0.944	1.151
Highest Reading of a Max. Therm. on July 12th	96.3	99.3
Lowest Reading of a Min. Therm. on Mar. 29th	41.7	40.9
Range of Thermometer Readings	54.6	58.4
Greatest Range in 24 hours on the 5th Sept...	29.0	28.9
Mean of all the Highest Readings	72.7	72.4
Mean of all the Lowest Readings.....	59.4	59.2
Mean Daily Range	13.3	13.2
Mean Temperature (deduced from Max. & Min)	65.2	64.9
Mean Temperature (deduced from dry bulb)..	64.7	64.4
Adopted Mean Temperature	65.0	64.7
Mean Temperature of Evaporation	60.2	59.7
Mean Temperature of Dew Point.....	56.4	56.0
Mean elastic force of Vapour.....inches	0.474	0.449
Mean weight of Vapour in a cub. ft. of air grains	5.1	5.1
Mean additional weight required for saturation,.	1.9	1.8
Mean degree of Humidity	78	76
Mean weight of a cubic foot of airgrains	527.6	528.0
Fall of rain	inches 25.159	19.204
Number of days on which rain fell	90	76
Mean amount of Cloud (an overcast sky 10)	4.6	3.5
Total number of miles of wind indicated.....	80037	84749
Mean Velocity of Wind per hour.....miles	9.2	9.7

SINCE MAY, 1883.

The Maximum monthly mean height of the Barometer was
in November, 1889, and wasinches 30.249
The Minimum ,, ,, in January, 1886, and was 29.844

The Maximum yearly mean height of the Barometer was in 1884, and was.....inches	30·057
The Minimum ,, ,, in 1890, and was	29·996
The greatest monthly range of the Barometer was in January, 1886, and was	1·201
The least ,, ,, in August, 1883, and was	0·188
The highest reading, of the Barometer, was on January 26th, 1887, and was	30 627
The lowest ,, ,, on 17th January, 1886, and was	29·155
Extreme range	1·472
The highest temperature was on July 20th, 1889, and was..	104·1
The lowest ,, ,, February 20th, 1851	37·7
The highest mean temperature of a month, was in August, 1885, and was.....	83·2
The lowest ,, ,, February, 1891, and was..	49·5
The greatest monthly mean weight of vapour, } in a cubic foot of airgrains} August, 1885	7·9
The least ,, ,, January and February, 1891, and was..gr	3·0
The highest observed Dew point was on the 30th August, 1885, and was	78·7
The lowest ,, ,, 19th January 1891, and was	28·6
The greatest fall of rain in a month, was in December, 1889, and was	8 952
The greatest number of days on which } rain fell in one monthdays} January, 1889	24
The greatest fall of rain in a year was in 1889 and was inches	26·044
The smallest ,, ,, ,, 1888 ,, ,,	13·745
The greatest number of rainy days in a year was in 1894 and was	90
The least ,, ,, ,, ,, 1882 ,,	40
The highest temperature registered in sunshine was on the 20th July, 1889, and was.....	158·8
The lowest temperature registered on ground was on the 25th January, 1891, and was	32·5
The highest observed sea temperature was on the 5th August, 1887, and was	85·0
The lowest ,, ,, 23rd January, 1891, and was	56·0
The smallest mean amount of cloud observed in one month was in August, 1890, and was	0·0
The greatest ,, ,, in January, 1894, and was	7·2

NOTES FOR THE SEPARATE MONTHS.

JANUARY.

THE Dew-point ranged between $40\cdot6^{\circ}$ on the 4th, and $54\cdot3^{\circ}$ on the 6th.

In Sunshine, the highest reading was $114\cdot2^{\circ}$ on the 20th.

On Ground, the lowest reading was $35\cdot5^{\circ}$ on the 18th.

The Sea has fallen to $59\cdot0^{\circ}$.

Thunderstorms passed on the 12th, 27th, and 30th.

Lightning was seen on the 6th, 7th, 8th, 9th, 11th, and 25th.

Hail fell on the 2nd, 3rd, 8th, 9th, and 12th.

Total Rainfall since last June $18\cdot075$ inches ; the average of 10 years, $15\cdot089$ inches.

A remarkably calm January. On nine days the mean daily velocity of the wind was less than five miles per hour, and only on one day did it reach 16 miles per hour.

FEBRUARY.

The Dew-point ranged between $38\cdot1^{\circ}$ on the 9th, and $54\cdot6^{\circ}$ on the 21st.

In Sunshine, the highest reading was $117\cdot5^{\circ}$ on the 16th.

On Ground, the lowest reading was $37\cdot4^{\circ}$ on the 16th.

The Sea has risen from $56\cdot8^{\circ}$ on the 25th to $59\cdot0^{\circ}$.

Total Rainfall since last June $22\cdot475$ inches ; the average of 10 years, $17\cdot176$ inches.

Total number of miles of wind highest on record of eleven years. During a violent storm from N.E., the mean velocity was 30 miles per hour for the five days 19th to 23rd ; and 36 miles hour for the 21st.

MARCH.

The Dew-point ranged between 57.4° on the 13th, and 38.5° on the 28th.

In Sunshine, the highest reading was 131.6° on the 19th.

On Ground, the lowest reading was 36.6° on the 29th.

The Sea has averaged 59.5.

Thunderstorms passed on the 13th.

Lightning was seen on the 22nd and 30th.

Hail fell on the 25th.

Total Rainfall since last June 23.965 inches ; the average of 10 years, 18.072 inches.

Thunderstorms passed on the 13th.

Lightning was seen on the 22nd and 30th.

Hail fell on the 25th.

Total Rainfall since last June 23.965 inches ; the average of 10 years, 18.072 inches.

APRIL.

The Dew-point ranged between 47.9° on the 13th, and 60.1° on the 20th.

In Sunshine, the highest reading was 138.8° on the 22nd.

On Ground, the lowest reading was 41.6° on the 7th.

The Sea has risen to 63.7° .

Thunderstorms passed on the 13th and 29th.

Lightning was seen on the 30th.

Total Rainfall since last June 25.478 inches ; the average of 10 years, 18.840 inches.

MAY.

The Dew-point, ranged between 51.1° on the 1st and 65.4° on the 28th and 30th.

In Sunshine, the highest reading was 142.2° on the 20th.

On Ground, the lowest reading was 46.3 on the 3rd.

The Sea has risen to 65.5°

Thunderstorms passed on the 7th.

Total Rainfall since last June 25.493 inches ;
the average of 10 years, 19.601 inches.

A slight earthquake shock, lasting from five to ten seconds, was felt throughout the island at 2.50 p.m. on the 13th.

JUNE.

The Dew-point ranged between 49.1° on the 27th and 71.0 on the 30th.

In Sunshine, the highest reading was 141.5° on the 26th.

On Ground, the lowest reading was 50.0° on the 5th.

The Sea has risen to 74.7 .

Total Rainfall since last June 25.493 inches ; the average of 10 years 19.682 inches.

A few drops of rain fell on the 13th, but not enough to measure.

JULY.

The Dew-point ranged between 49.7° on the 12th and 73.8° on the 30th.

In Sunshine, the highest reading was 147.4° on the 12th.

On Ground, the lowest reading was 58.3° on the 3rd.

The Sea has risen to 81.3° .

AUGUST.

The Dew-point ranged between 54.6° on the 28th, and 72.8° on the 31st.

In Sunshine the highest reading was 147.5° on the 17th.

On Ground the lowest reading was 60.2° on the 23rd.

The Sea has ranged from 78.5° to 79.5° .

Lightning was seen on the 26th and 27th.

SEPTEMBER.

The Dew-point ranged between 73.8° on the 18th, and 58.3° on the 19th.

In Sunshine the highest reading was 145.7° on the 23rd.

On Ground the lowest reading was 60.4° on the 23rd.

The Sea has fallen to 77.4° .

Thunderstorms passed on the 30th.

Lightning was seen on the 18th and 19th.

Total Rainfall since last June 0.234 inches ; the average of 10 years, 1.524 inches.

Temperature has been much above the average. No rain fell before the night of the 30th except a few drops on the 18th. September, 1893, was the first rainless September in 12 years.

OCTOBER.

The Dew-point ranged between 52.8° on the 1st, and 72.9° on the 29th.

In Sunshine, the highest reading was 136.9° on the 1st.

On Ground, the lowest reading was 55.2° on the 15th.

The Sea has averaged 75.0° .

Thunderstorms passed on the 1st, 2nd, 12th, and 13th.

Lightning was seen on the 4th, 5th, 14th, 15th, 16th, and 17th.

Total Rainfall since last June, 1.856 inches; the average of 10 years, 4.537 inches.

NOVEMBER.

The Dew-point ranged between 64.4° on the 1st, and 46.7° on the 3rd.

In Sunshine, the highest reading was 130.5° on the 7th.

On Ground, the lowest reading was 46.8 on the 4th.

The Sea has averaged 68.3° .

Thunderstorms passed on the 2nd, 9th, 10th, 15th, and 25th.

Lightning was seen on the 1st, 7th, 8th, 13th, 14th, 20th, 24th, and 26th.

Hail fell on the 15th.

Total Rainfall since last June 6.455 inches; the average of 10 years, 7.842 inches.

At noon on the 30th, during a dead calm, several waterspouts were seen on the sea, three or four miles N.E., and N.W. of this station.

DECEMBER.

The Dew-point ranged between 56.6° on the 6th, and 36.0° on the 18th.

In Sunshine, the highest reading was 113.2° on the 16th.

On Ground, the lowest reading was 37.5° on the 19th.

The Sea has averaged 64.5° .

Thunderstorms passed on the 2nd, 9th, 13th, 21st, 22nd, 25th, 26th, and 27th.

Lightning was seen on the 1st, 7th, 11th, 12th, and 23rd.

Hail fell on the 7th, 21st, and 26th.

Total Rainfall since last June, 13.746 inches; the average of 10 years, 11.495 inches.

NOTES FOR THE YEAR.

The Dew-point ranged between 73.8° on the 30th July, and 36.0° on the 18th December.

In Sunshine, the highest reading was 147.5° on the 17th August.

On Ground, the lowest reading was 35.5° on the 18th January.

The Sea has ranged from 56.8° on February 25th, to 79.5° on August 26th.

Thunderstorms passed on 25 days.

Lightning was also seen on 32 days.

Hail fell on the 10 days.

CORRIGENDA.

In 1892 the mean reading of the Barometer for the year was given 29.920, and mean for ten years 30.016, should be 30.003 and 30.025 respectively.
